CRAFTED CABINETRY AND MILLWORK

Thermofoil Doors

Every thermofoil door we make. A vinyl foil pressed onto a routed MDF core, so face and profile are one piece. Made to your sizes in one-sixteenth-inch increments.

Prices effective November 2026 and subject to change.

Arch tops

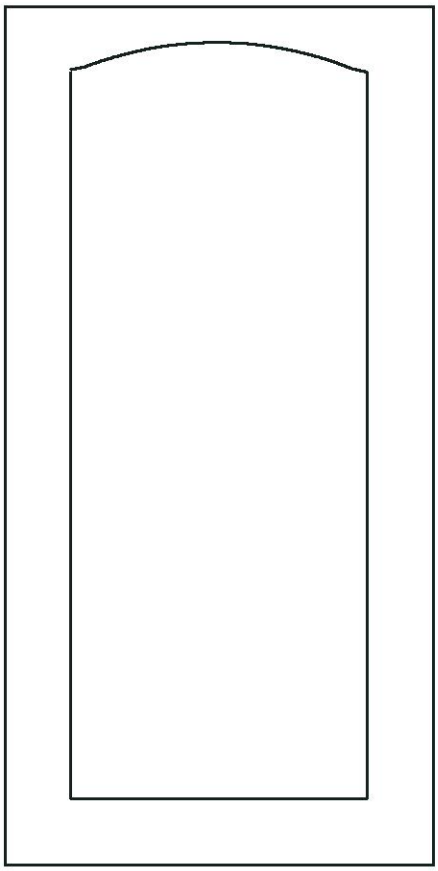

The arch is a top shape, not a different edge. A door and its arched version in the same series share one edge profile — which is why their cross-sections are identical. Every style below is made to your sizes with the top you choose.

Square

Flat top rail.

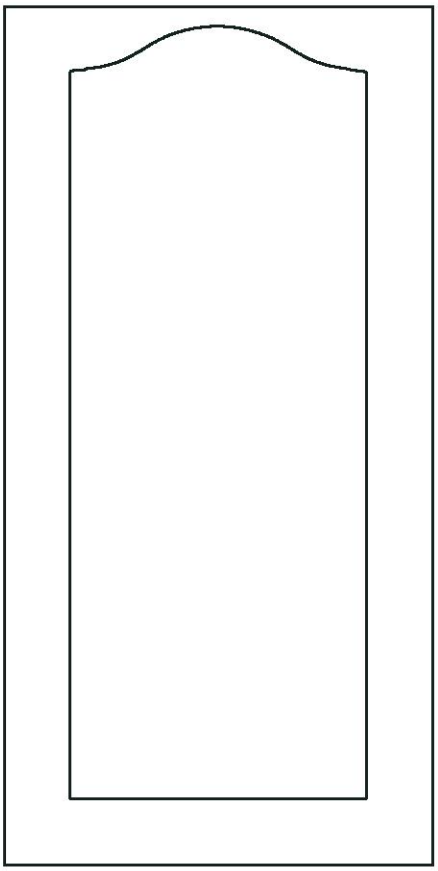

46 of the 64 thermofoil styles. Every style not listed under Eyebrow or Cathedral.

Eyebrow

A shallow, continuous curve. Cal Door calls this a Juliano top.

12 styles: AJ-768, AL-767, Atlanta RTF, Juliano RTF, Kathryn RTF, OP-714, OP-716, OPJ-1, OPJ-3, Rogue Juliano, Rogue Juliano Glass, Tulalip Juliano.

Cathedral

A deeper curve with a reverse at each shoulder. Cal Door calls this a Liberty top.

6 styles: Liberty RTF, OPL-1, OPL-3, Rogue Liberty, Tulalip Liberty, Tulalip Liberty Glass.

One edge profile, three tops

Cal Door prints this same drawing under Tulalip Square, Tulalip Juliano and Tulalip Liberty. The top changes; the edge does not.

Prices

Per square foot, by door style and foil group. Every foil on the colour chart carries its group. Made to your sizes; 2 sq ft minimum per door, 1 per drawer front.

Door style	MDF	949 White	Group 1	Group 2	Group 3	Group 4	Group 5
