CRAFTED

CABINETRY AND MILLWORK

Wood Profile & Prices 2025

To Our Customers

Crafted Cabinetry and Millwork is a working cabinet shop in Concord, California. We build cabinetry, and we supply doors, drawer fronts, drawer boxes and moulding to other shops, to contractors and to homeowners.

Everything in this book is made to your sizes after you order. Nothing is stocked and nothing is rounded to a fixed increment. Doors are priced per square foot, the way you already quote them, with a two square foot minimum per door and one square foot per drawer front — a minimum that applies to a small piece, not to your order.

Three things worth knowing before you price anything

We finish. Doors are sprayed and cured in our own booth in Concord and arrive ready to hang. Most door suppliers ship raw. If you do not have a booth, or you have one and it is the bottleneck, that is the reason to call.

One door is an order. No minimum quantity and no minimum dollar amount. A single replacement door is a normal order here and one of the most common reasons people come to us.

Cut for glass costs the same as solid. One square foot rate per style and species, whether the door is cut for glass or has a panel in it. There is no separate glass-frame column to price from and no glass-ready charge.

What you can expect

- Unfinished doors, drawer fronts and drawer boxes ship in 10 business days; finished doors in 15. Those are ship dates, counted from the day payment clears. Transit is on top and is estimated at checkout.
- Prices in this book are per square foot and are current as of the date on the cover. They are subject to change.
- If something will be late, we will tell you before the ship date, not after it.

Wood Index 236-237

Payment & Delivery

Payment

You pay when you order. Production time starts the day the payment clears, which for a card is normally the same day. Card and PayPal are accepted at checkout on shop.craftedcabinet.com.

There is no minimum invoice charge. One door is an order: no minimum quantity and no minimum dollar amount.

Trade accounts

Cabinet shops and contractors can apply for a trade account at shop.craftedcabinet.com/trade. Send a cut list and you get a price back within one business day.

Sales tax

California sales tax applies where required. If you are buying for resale, send a current resale certificate and the tax comes off.

Delivery

Lead times in this book are **ship dates, not delivery dates**. Doors, drawer boxes and short moulding go out by parcel; long moulding, handrail and anything crated goes by freight. Transit is estimated at checkout and is not guaranteed by the carrier — no LTL carrier will stand behind a transit figure, so we do not publish one.

- We ship to the lower 48 states. We do not ship to Alaska or Hawaii.
- Free local pickup at the shop in Concord.
- Shipping is calculated at checkout from the order itself, not from a flat rate.
- Mixed orders ship together on the longer lead time. Ask us to split an order and we will.
- Moulding over 8 feet crosses a carrier length surcharge and ships by freight. Lengths of 8 or 10 feet can be cut in half for parcel — say so on the order if that suits the job.

Damage and shortages

Inspect the shipment before signing for it and note any damage on the delivery receipt. Tell us within five business days, with photographs of both the product and the packaging, and we will deal with the carrier.

Warranty & Care

Limited lifetime warranty

Crafted Cabinetry and Millwork warrants its products against defects in material and workmanship under normal home use, for the original purchaser at the original installation site. If a covered issue occurs we will review it and determine the appropriate remedy, which may be repair, replacement, or replacement parts. Our liability is limited to the net invoice price of the piece as sold.

Covered: defects in workmanship, defective components supplied by us, and manufacturing issues affecting the intended function of the product.

Not covered: the natural characteristics of wood — hairline cracking, mellowing and colour change with age and light, grain and colour variation between boards; normal wear and tear; improper installation; damage from neglect, misuse or accident; modifications made after delivery; and damage from moisture, humidity or environmental conditions outside the care guidelines below.

Wood moves, and that is not a defect

These are unfinished and finished solid wood products. Once they leave us we cannot know the conditions they are kept in, and a change in temperature or humidity can warp, twist or crack a door within hours. Warping, swelling, twisting and cracking are a natural occurrence in wood and are not covered as defects.

- Doors wider than 24 inches or taller than 60 inches are not guaranteed against warping or twisting. A centre stile is strongly recommended over 24 inches wide and a centre rail over 50 inches high; neither carries an upcharge.
- Doors ordered over 50 inches high without a centre rail are not guaranteed.
- Store doors flat, indoors, out of direct sun, and away from a wet slab or fresh plaster. Do not stand them on edge against a wall.
- **Seal unfinished doors on all six faces, promptly, and seal both faces equally.** A door finished on the front only will cup. Most warranty calls on unfinished stock come back to this.

If we finished it

Doors finished in our booth in Concord are covered on the finish as well as the wood. Doors you finish yourself are covered on the wood and the workmanship; we are not responsible for a door damaged by finishing.

Tolerances and what is acceptable

- Height and width tolerance is plus or minus 1/16 inch.
- Minor marks — a slight dent, bump, scratch or router mark — are allowable and should not be visible at about two feet.
- On the back of a door or drawer front, repaired scalps and slight imperfections are acceptable.

Cleaning

- Warm soapy water and a soft clean cloth.
- Abrasive and solvent-based cleaners are not recommended, and using them voids the warranty.

Claims

Email information@craftedcabinet.com with your order number, a description of the issue, photographs and any relevant project details. Photographs make the difference between a claim settled this week and one settled next month.

How to Order

Sizes

Submit **finished door sizes only**, width by height, measured individually and given to the sixteenth of an inch. We cut to the number you give us, so a size that is wrong is a new door rather than a correction. Minimum and maximum sizes vary by style and panel — the size charts on pages 162 to 181 govern.

What to specify

Seven things define a door: style, species, size, panel, outside and inside edge, stile and rail width, and boring. Size and boring are the two that cannot be put right afterwards. Settle overlay and boring once for the job rather than per door.

Three ways to order

- **Online** at shop.craftedcabinet.com. Enter your sizes on the product page and the price updates as you type.
- **Send a cut list.** Email it to information@craftedcabinet.com. Any format you already use is fine, as long as each line carries the style, the species, the size, the boring and whether it is a door or a drawer front.
- **Use the order form** on page 234 for doors and page 235 for moulding.

Separate and label different materials, door styles and specials — glass doors, French lites, lazy Susan and wainscot panels — on any cut list you send.

Confirmations and changes

You get an order confirmation with a ship date. If you have not had one within one business day, call before resending, so the order is not duplicated. Check it the day it arrives: once an order is confirmed and in production it cannot be changed, and material is already cut.

Quotes

Mark a request QUOTE ONLY. Most quotes go back the same day; a large or special request may take longer. Quotes are valid for 30 days.

Specialty work

Arched, radius, angled, wainscot and custom work needs a drawing. Email or upload it — CAD preferred, a dimensioned sketch is fine. We give you a price and a lead time when the drawing is approved.

Pricing

All prices in this book are per square foot unless the page says otherwise, and are subject to change. Doors carry a 2 square foot minimum and drawer fronts 1 square foot, applied per piece and not per order.

Option	Charge
Finishing, per door	$180.00
minimum pieces per order, finishing	8
Hinge boring, per door	$8.00
Cut for glass — glass ready	no charge

Cut for glass is charged at the solid door rate for that style and species. The cut-for-glass columns in this book are Cal Door's dealer costs and are printed for reference; what you pay is the door rate.

Specifying & Customising

No Shape

Doors can be ordered **No Shape**, left 1/8 inch oversize in width and height, with the outside edge and the back left unprofiled for you to machine. We also recommend ordering 1/16 inch oversize in width or height on a shaped door where the opening is not yet final, to allow for minor trimming and fitting.

Lead times and minimums

Product	Production, business days
Unfinished doors and drawer fronts	10
Drawer boxes	10
Finished doors	15
Vanities	15
Samples	1

Counted from the day payment clears, and these are ship dates. A mixed order ships together on the longer one unless you ask us to split it.

Options that change the price

- **Finishing** — $180.00 per door, minimum 8 pieces on the order. Sprayed and cured in Concord. Say the colour or send a sample; a drawdown comes back for approval before the run.
- **Hinge boring** — $8.00 per door. Give the cup diameter, the distance from the door edge and the distance from the top and bottom. We will not bore different measurements top and bottom; they must be identical.
- **Cut for glass** — no charge, at the solid door rate. Doors come with a rubber stop groove as standard. Say if you want wood stops, or no groove.
- **Centre stile and centre rail** — no charge, and recommended over 24 inches wide or 50 inches high.

Profiles

The profile pages from 120 onward show every inside edge, outside edge and panel we can run, with the page the rate sits on. Standard combinations are listed with each series; anything from the standard tables is no upcharge unless the series page says otherwise.

Species

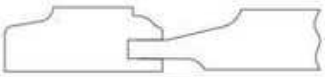

Rates in this book cover the full Cal Door species range. The twelve we stock and quote day to day are MDF, paint-grade maple with an MDF or maple panel, alder select and rustic, cherry, maple natural, select and rustic, walnut, white oak, and rift-sawn white oak. Anything else on these pages is available to order — ask, and we will confirm the rate and the lead time before you commit.

Samples

Order a sample door or a species sample at shop.craftedcabinet.com. Samples ship in one business day. On a matching job — one or two doors years after the kitchen was built — send photographs of the door face, the edge and the back, with a tape across the stile, and we will identify the style.

Appliance Panels available for Cope 'N Stick & Mitered Doors

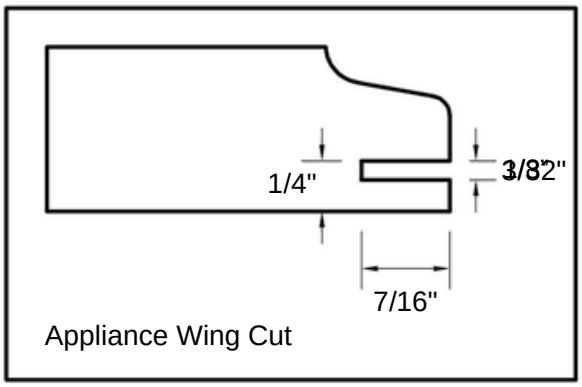

Appliance Wing Cut:

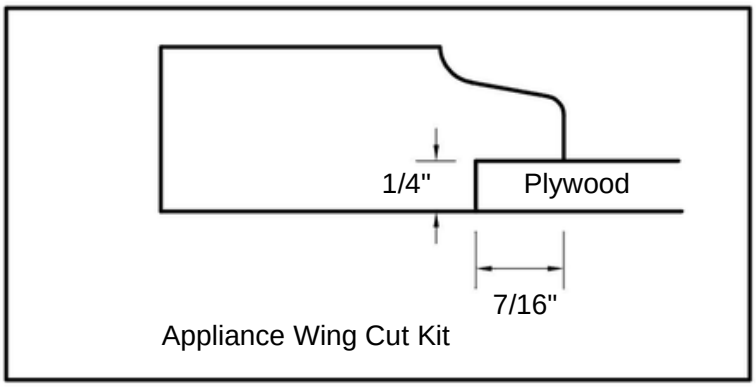

Add $20.25 per door.
Use where the appliance can accommodate the full thickness of the panel on all four sides.
Each piece is routed on all four sides of the door.
Available with no lip or D3 (square) outside edge profiles only.

Appliance Wing Cut Kit:

Add $33.75 per door.
Use where the appliance requires extra room behind the handle or at the bottom of the dishwasher door.
Each piece is routed on three sides of the door. One edge is prepared to receive a 1/4” extension.
Available with no lip or D3 (square) outside edge only.
Must specify right or left when ordering an arch door style.
Refrigerator Standard Application:
Subtract 2” from width of panel. Wing Cut Kit includes a 2 1/2” x 1/4” plywood extension.
Dishwasher Standard Application:
Subtract 1” from height of panel. Wing Cut Kit includes a 1 1/2” x 1/4” plywood extension

Appliance Wing Cut

Appliance Wing Cut Kit

Applied Molding Options:

Accent Materials:
Add 10% to sq. ft. price if the applied molding is a different material than the door.
Applied moldings come standard as drawn in our profile book.

Juliano/Merlot (solid) & Kathryn/Chablis (inset) Arch with Applied Molding:

Juliano & Merlot with Applied Molding: *use Solid Square Applied Molding sq. ft. price + $337.50 per door.*
Kathryn & Chablis with Applied Molding: *use Inset Square Applied Molding sq. ft. price + $337.50 per door.*
Available with all Applied Moldings: refer to pages 152-153 for profiles.
Available with all Standard Outside Edges: refer to pages 120-124 for profiles.
Available with Rosewood Outside Edges: refer to page 125 for profiles.
Juliano & Merlot are available with all Large Solid Panels or F Panel: refer to pages 148-151 for profiles.
Kathryn & Chablis are available with plywood or VP Panel: refer to page 148 for profiles.

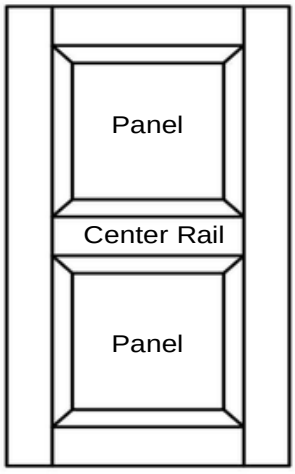

Custom arched applied molding doors are available. Fax or E-mail detailed drawings for price quote.

Special Dry Fit:

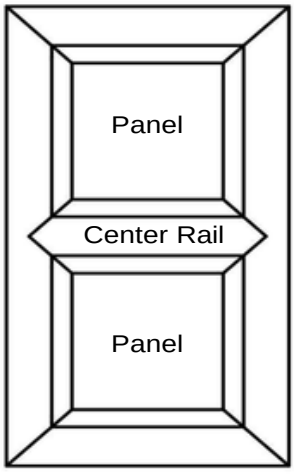

All of our moldings are cut precise, fitted and glued in. We do not use any pins or fasteners.
Some of our molding styles by design are glued directly on to the panel. This can be problematic for some climates.
If your shop or the job site is in an area where this is a concern, we have an option.
Order your doors with the molding dry f t .
We will not glue the molding in, which will allow you time to finish your doors and stabilize to your climate.
Once this is completed you can either pin or glue molding in.

Center Rails:

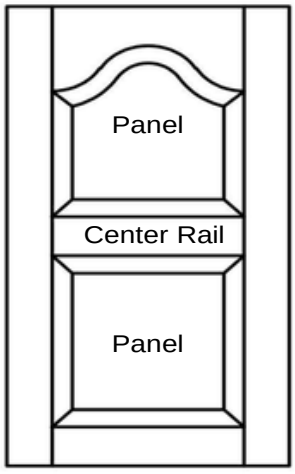

Crafted Cabinetry strongly recommends a center rail on any door over 50" high. This is standard and no up charge will apply.
Any door 50" and over in height must specify with or without a center rail.
Any door over 50" without a center rail is not guaranteed against warping or twisting.
Any door under 50" with a center rail add 50% to sq. ft. price.
Any special placement center rail add 50% to sq. ft. price.
Multiple center rails refer to wainscot pricing on pages 118-119.

Cope N' Stick Square

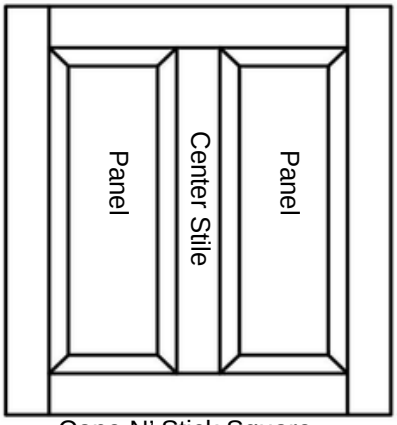

Mitered Square

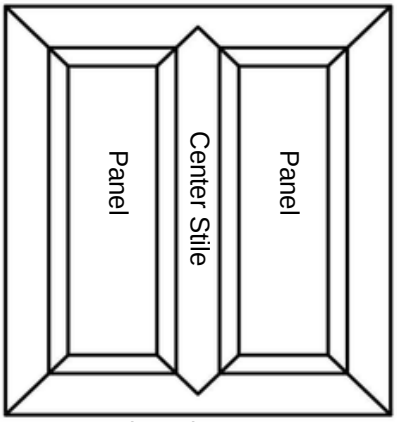

Cope N' Stick Arch

Center Stiles:

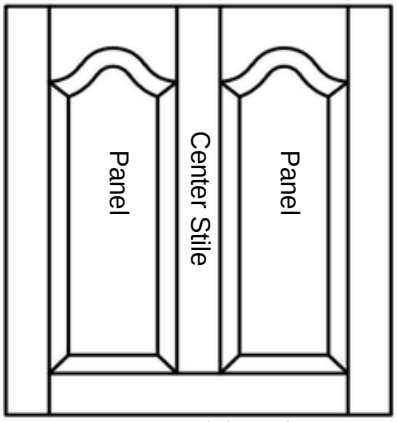

Crafted Cabinetry strongly recommends a center stile on any door over 24" wide.
Any door 24" and over in width must specify with or without a center stile.
Any door 24" and over in width without a center stile is not guaranteed against warping or twisting.
Add 25% to sq. ft. price for center stile.
Multiple center stiles refer to wainscot pricing on pages 118-119.

Cope N' Stick Square

Mitered Square

Cope N' Stick Arch

Customer Supplied Material: This is for materials not shown in our current price book.
Finished door thickness may vary depending on the thickness of material received.
Our standard finished door thickness is 13/16" thick.
Order must be sent to the office for a price quote and amount of material needed to complete job.
Do not ship material prior to receiving amount needed to complete job.
Delivery dates will be assigned upon receipt of material.

Material pick up on our truck:

For material amounts up to 250 feet - $202.50 pick up fee will apply.
For material amounts over 250 feet - $337.50 pick up fee will apply.

For Solid Application:

Take the total square footage of the job, multiplied by 2.5 which will give you the amount of material needed.
Example: 100 sq. ft. job x 2.5 = 250 board ft of material needed.

For Inset Plywood Application:

Take the total square footage of the job, divided by 32 which will give you the number of sheets needed.
Add 20% to that total for waste, this will give you the final amount of sheets needed.
Lumber for the frames, take the exact square footage and that will be the amount needed.
Example: 100 sq. ft. inset job will require 100 board ft. of lumber.

Drawer Front Options:

Solid Drawer Fronts: minimum 1 sq. ft.
52 standard outside edge profiles.

Designer, Solid with Rosewood, Solid with Applied Molding, Routed, 3 & 5-Piece Drawer Fronts:
minimum 1 sq. ft.
Designer Standard Panel Solid Drawer Fronts: *use designer drawer front sq. ft. price, refer to page #94.*
Designer Premium Panel Solid Drawer Fronts: *use designer drawer front sq. ft. price, refer to page #96.*
Designer drawer fronts are available in 13/16" and 1".

Solid Drawer Fronts with R-2, R-3, R-6, R-7, R-8 & R-9 Outside Edge:
use solid drawer front sq. ft. price + $13.50 per piece.
Solid Drawer Fronts with R-4 or R-5 Outside Edge: *use solid drawer front sq. ft. price + $18.90 per piece.*

Routed Drawer Fronts: *use solid drawer front sq. ft. price + $13.50 per piece.*

Solid Drawer Fronts with Applied Molding: *use solid drawer front sq. ft. price + molding charge per piece.*
Molding charge ranges from $27.00 to $33.75 per drawer front, refer to page #104 for pricing.

3-Piece Drawer Fronts: *use solid drawer front sq. ft. price + $33.75 per piece.* Must specify stile widths.

5-Piece Solid Panel: *use matching solid panel door sq. ft. price + $13.50 per piece.*
5-Piece Inset Panel: *use matching inset panel door sq. ft. price + $10.80 per piece.*

Edge Detail Change:
52 standard outside edge profiles.
D-3 (square) on one stile: no additional charge.
Combining two outside edge profiles on one door: *add 10% to sq. ft. price.*
Example: B-2 (fingerpull) on the top & bottom B-3 (no lip) on both sides.

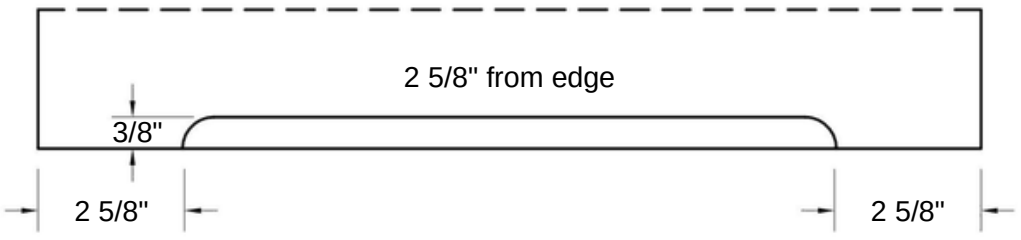

Rosewood Outside Edge to Cope 'N Stick Doors & 5-Piece Drawer Fronts (ran on CNC):
R-2, R-3, R-6, R-7, R-8 & R-9: *add $6.75 to sq. ft. price*
R-4 or R-5: *add $9.45 to sq. ft. price*

Rosewood Outside Edge to Mitered Doors & 5-Piece Drawer Fronts (ran on molder):
R-2, R-3, R-4, R-5, R-6, R-7, R-8 & R-9: *add $4.05 to sq. ft. price*

F-Panel: *(Solid Wood & MDF)*
Use Solid Panel pricing for "F" panel application.
Available in all stocked wood species and MDF.
F-Panel recommended when ordering any groove patterns to avoid seeing a MDF core.
F-Panel recommended for materials in which plywood and solid lumber have wide color variations;
such as African Mahogany & Sapele.
Recommended for a closer match when using a clear or light stain, due to the natural variation between plywood and solid lumber.
Recommended for all rustic materials. Plywood only stocked in Rustic Alder.
We currently stock solid lumber in Alder-Rustic, Hickory-Rustic, Maple-Rustic, Walnut-Rustic, White Oak-Rustic.
For all other rustic species please refer to "Customer Supplied Material" found on page #111.

3/8" Thick "VP" Panel: (Veneer)
Use solid panel sq. ft. pricing.
Recommended in place of "F" Panel (solid) for dry and humid environments.
Stocked in Paint Grade Maple, Alder-Select, Alder-Rustic, Cherry-Select, Maple-Select, Walnut-Select, White Oak-Select
and White Oak-Rift (Straight Grain).
Non-stock materials are available. Additional lead time may be required *(call for pricing).*

Fingerpull Notch:
Add $5.40 per notch.
Notch starting and stopping 2 5/8" from each side of rail.
No special placement available.

French Lites:

Cope 'N Stick French Lites:
Minimum lite opening 2 1/2" x 2 1/2".
Use Cope 'N Stick Inset sq. ft. pricing plus mullion charges below.
Standard placement of lites: *$13.50 per lite.*
Special placement of lites (more than one vertical mullion or any unequal openings): *$16.20 per lite*
Standard route accommodates one piece of glass and comes standard with rubber stop groove.
Individual lites (this accommodates multiple pieces of glass): add an additional *$13.50 per lite.*
Hafele clear vinyl glass retainer available upon request: *$5.40 per door.*
Wood stops available upon request (when ordering wood stops must specify no rubber stop groove): *$6.75 per door.*

Mitered French Lites:
Minimum lite opening 2 1/2" x 2 1/2".
Use Mitered Inset sq. ft. pricing plus mullion charges below.
Standard placement of lites: *$16.20 per lite.*
Special placement of lites (more than one vertical mullion or any unequal openings): *$18.90 per lite*
Standard route accommodates one piece of glass and comes standard with rubber stop groove.
Individual lites (this accommodates multiple pieces of glass): add an additional *$13.50 per lite.*
Hafele clear vinyl glass retainer available upon request: *$5.40 per door.*
Wood stops available upon request (when ordering wood stops must specify no rubber stop groove): *$6.75 per door.*

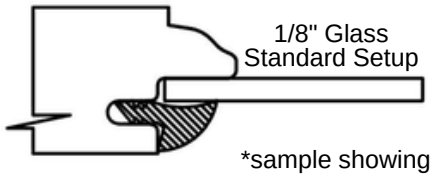

Applied Molding French Lites (available in Cope 'N Stick & Mitered):
Minimum lite opening 2 1/2" x 2 1/2".
Use Cope 'N Stick or Mitered Applied Molding Inset pricing plus mullion charges below.
Standard placement of lites: *$18.90 per lite.*
Special placement of lites (more than one vertical mullion or any unequal openings): *$21.60 per lite.*
Standard route accommodates one piece of glass and comes standard with rubber stop groove.
Individual lites (this accommodates multiple pieces of glass): add an additional *$13.50 per lite.*
Hafele clear vinyl glass retainer available upon request: *$5.40 per door.*
Wood stops available upon request (when ordering wood stops must specify no rubber stop groove): *$6.75 per door.*

Standard Specialty French Lites (refer to pages 90-93 for profiles and pricing):
Use matching inset door style sq. ft. price + per door charge.
Available in both Cope 'N Stick & Mitered.
Available in all door styles and thicknesses, with or without Applied Moldings.
All option charges apply to sq. ft. cost (Example: larger stiles & rails and thicker doors are subject to an up charge).
Pricing is based on doors that are up to 48" in height. Doors over 48" must be quoted.
The door height must be more than double the width of all arched mullion designs.
We will provide a CAD drawing for your approval prior to construction.
Lead time is between 2 to 4 weeks once CAD drawings have been approved.
Not available with individual lites.
Standard route accommodates one piece of glass.

Custom Specialty French Lites:
General Guidelines: Please keep in mind the possibility of size restraints based on chosen style.
Depending on design, cost can range from $337.50 to over $945.00 per door and up.
Customer is responsible for providing all measurements and details necessary.
CAD or Digital CAD drawings preferred.
Once this information is received we will generate a price quote.
Once price quote is approved we will produce a detailed CAD drawing with all specifications.
CAD must be signed and approved before manufacturing will begin, which is approximately four weeks.
$202.50 CAD fee will be charged if you do not go through with the order.
Standard route accommodates one piece of glass.

Rubber Stop Application

Rubber stop groove designed to receive Hafele clear panel retainer as shown.

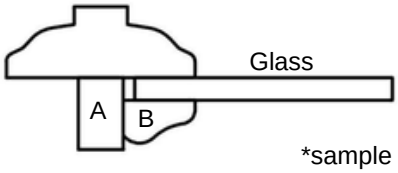

*sample showing
#2 Cope 'N Stick

Wood Stop Application

A - Mullion added to create individual Lights

B - 1/4" x 3/8" Wood Stop

*sample showing
#2 Mullion

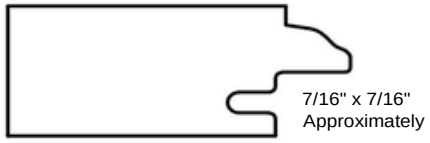

Glass Frames:

Our glass doors come standard with a rubber stop groove to accommodate the Hafele vinyl glass retainer.
Hafele clear vinyl glass retainer available upon request: *$5.40 per door.*
Wood stops available upon request: *$6.75 per door.*
When ordering wood stops must specify no rubber stop groove.

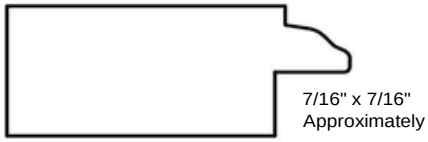

Glass Frame Order Options:

Standard Glass Door Route
No Rubber Stop Groove
No Glass Route/Panel Groove OK
No Glass Route/No Panel Groove. Available on Mitered frames ONLY.

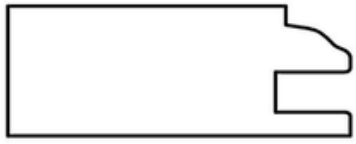

Crafted Cabinetry always recommends to wait for frames to arrive BEFORE ordering glass. The dimensions here are APPROXIMATELY ONLY.

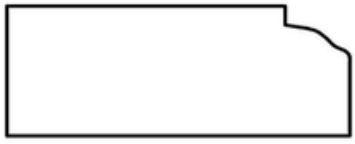

Standard glass door route.
Comes standard with rubber stop groove.
Must specify iy you would like to purchase rubber stop.

No rubber stop groove.
Must specify if you would like to purchase wood stop.

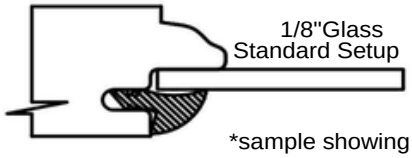

No glass route - comes with standard panel groove.

No glass route & no panel groove.
Available on mitered Frames ONLY.
Not available on Cope 'N Stick door styles.

Rubber Stop Application

Rubber stop groove designed to receive Hafele clear panel retainer as shown.

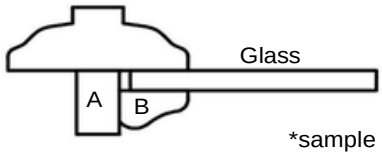

*sample showing
#2 Cope 'N Stick

Wood Stop Application

A - Mullion added to create individual Lights

B - 1/4" x 3/8" Wood Stop

*sample showing
#2 Mullion

Lazy Susan:

Cope 'N Stick Lazy Susan Application:

When ordering Lazy Susan you must specify LS on order form. We will add 1" in width and a D-3 OSE to one stile. This will allow you to miter or butt joint doors for assembly.
Add $13.50 per door.

Mitered Lazy Susan Application:

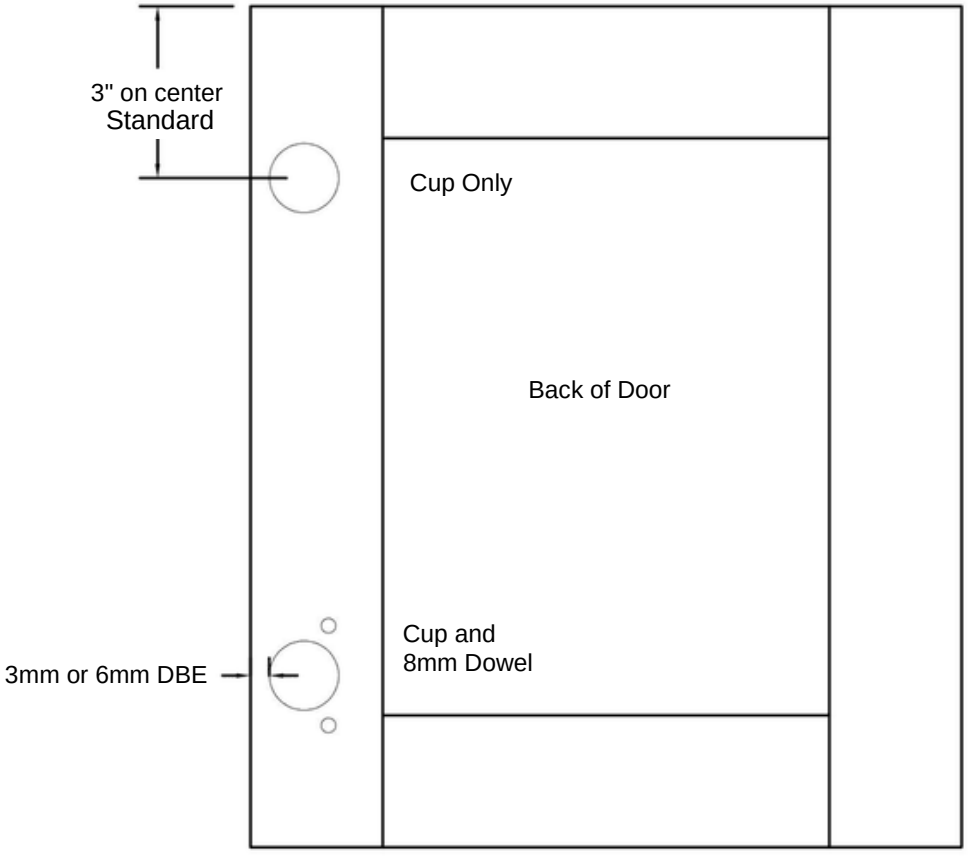

Option #1: order 2 doors with one D-3 (square) stile on each door.
Option #2: order one door oversized this will allow you enough room to cut in half and miter for reassembly.
Must specify no pins: a*dd $33.75 per door.*

Prebore Applications:

Standard Prebore Placement: *add $4.05 per bore.*
Must specify Cup only or Cup & Dowel.
Must specify DBE (distance from back edge) 3mm or 6mm only.
Standard placement includes 2 holes, 3" on center from top and bottom.
Any door over 50" will receive 3 holes unless specified otherwise.
Must specify right or left stile for arch doors.

Special Prebore Placement: *add $5.40 per bore*

You must specify the distance from the top and bottom of door.
We will not prebore different measurements top and bottom, they must be identical distances.
Must specify right or left stile for arch doors.

35mm cup diameter
12mm deep bore
DBE: Distance from Back -Edge

Rope Moldings:
Rope moldings are available in all materials.
Additional lead time may be necessary for some rope molding materials.

Rosewood Edge:
Cope 'N Stick Doors & 5-Piece Drawer Fronts (ran on CNC):
R-2, R-3, R-6, R-7, R-8 & R-9
R-4 or R-5

Mitered Doors & 5-Piece Drawer Fronts (ran on molder):
R-2, R-3, R-4, R-5, R-6, R-7, R-8 & R-9

Solid Drawer Fronts with Rosewood Edge (ran on CNC):
R-2, R-3, R-6, R-7, R-8 & R-9
R-4 or R-5

Sizing Information:
We add 1/8" on the width and height to all sizes. This allows us to oversize 1/16" all the way around which is removed during the manufacturing process to achieve a cleaner edge cut.
Doors are manufactured to the nearest 1/16 of an inch.

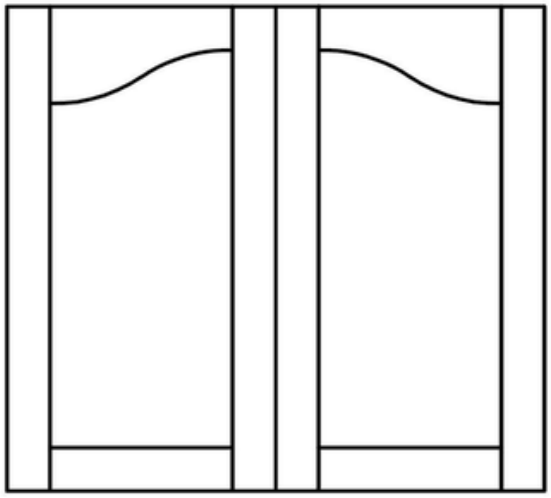

Standard Sizing:
Doors are manufactured to the nearest 1/16".

Exact Sizing:
If tighter tolerances are required, order Exact Size and we will manufacture to the nearest 1/32 of an inch:
add 10% to sq. ft. price.

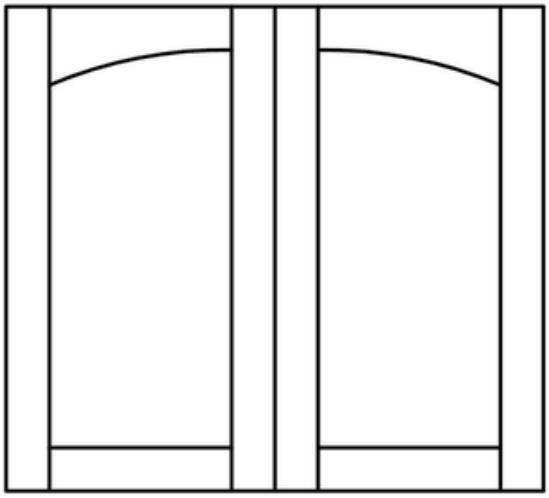

No Shape:
Doors can be ordered No Shape where we leave the doors 1/8" oversized width and height.
This will allow for minor trimming and fitting.

Flush Inset Application:
It is virtually impossible to keep wide and/or tall doors flat even with the use of European hinges.
We recommend using a Brass Ball Catch from Rockler Woodworking & Hardware.
By using this product, 99% of your closing and/or warp issues will be eliminated.
Part #28613:11/16" long x 5/16" wide
Part #28662: 29/32" long x 11/32" wide

Split Arches:
Atlanta, Bordeaux, Chablis, Chateau, Juliano, Kathryn, Liberty and Merlot styles: *add 50% to sq. ft. price.*
Custom split arches available, fax or email detailed drawings for quote.

Liberty (Solid) & Atlanta (Inset)
Chateau (Solid) & Bordeaux (Inset)

Juliano (Solid) & Kathryn (Inset)
Merlot (Solid) & Chablis (Inset)

Tooling - Custom:

We outsource our Cope 'N Stick, Panel and Outside Edge tooling.
Outsourced tooling generally takes two weeks to receive once CAD drawings are approved.
The majority of Mitered and Applied Molding Profiles are made in house and take approximately one week for manufacturing once CAD drawings are approved.
Once tooling is received it takes two to three weeks for manufacturing
We keep all tooling and add to our tooling library file.

Cope ‘N Stick Tooling:	$810.00 to $1147.50
Raised Panel Tooling:	$675.00 to $810.00
Outside Profile Tooling:	$675.00 to $810.00
Mitered Profile Tooling:	$540.00 to $675.00
Applied Molding Tooling:	$540.00 to $675.00

Set-Up Fee: *$202.50*
Customer will be charged a *Set-Up Fee of $202.50* each time they place an order with custom tooling.
All add-on orders will be charged a *$202.50 Set-Up Fee*, regardless of order size.

V-Grooves, Beaded V-Grooves & Square Grooves:
Maximum panel size 42” wide by 60” tall. Doors over 60” tall will require a center rail.
Plywood will show MDF core after grooving. Recommended with “F” panel application, for best results.

Camden (refer to page #16 for pricing) :

All other door styles with grooves:

F Panel Application: *use solid door sq. ft. price + groove placement charge below per sq. ft.*
Plywood Application: *use inset door sq. ft. price + groove placement charge below per sq. ft.*
Groove placement options:
1 1/2” On or O f center: *add $6.75 to sq. ft. price.*
2” apart On or O f center: *add $5.40 to sq. ft. price.*
3” apart On or O f center: *add $4.05 to sq. ft. price.*

Wainscot Panels: Cope 'N Stick

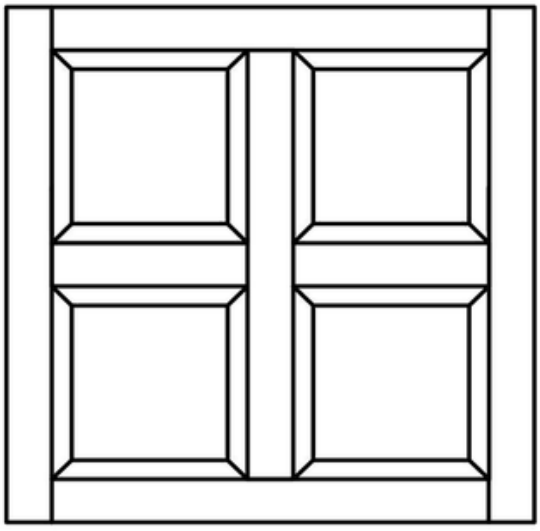

Recommended to order with D-3 (square) Outside Edge.
Cope 'N Stick wainscot panels can be ordered with different size stiles and rails.
Standard frame size options are 1 3/4", 2", 2 1/4", 2 1/2" & 3".
CAD or detailed drawing required.
Wainscot Panels less than 4 sq.ft. or under 12" wide will be quoted as a flat fee.

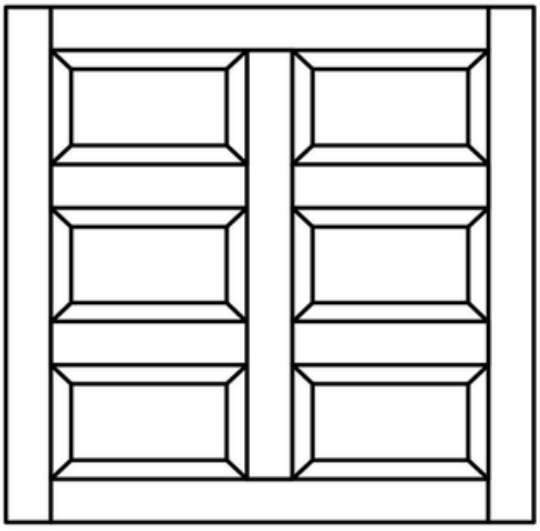

2 to 3 Panels with standard size stiles & rails (up tp 96” wide or tall): *use matching door sq.ft. price + 25% per sq.ft.*
2 to 3 Panels with custom size stiles & rails (up to 96” wide or tall): *use matching door sq. ft. price + 50% per sq. ft.*

4 Panels with stanard size stiles & rails(up to 96” wide or tall): *use matching door sq.ft. price +50% per sq.ft.*
4 Panels with custom size stiles & rails (up to 96” wide or tall): *use matching door sq. ft. price + 75% per sq. ft.*

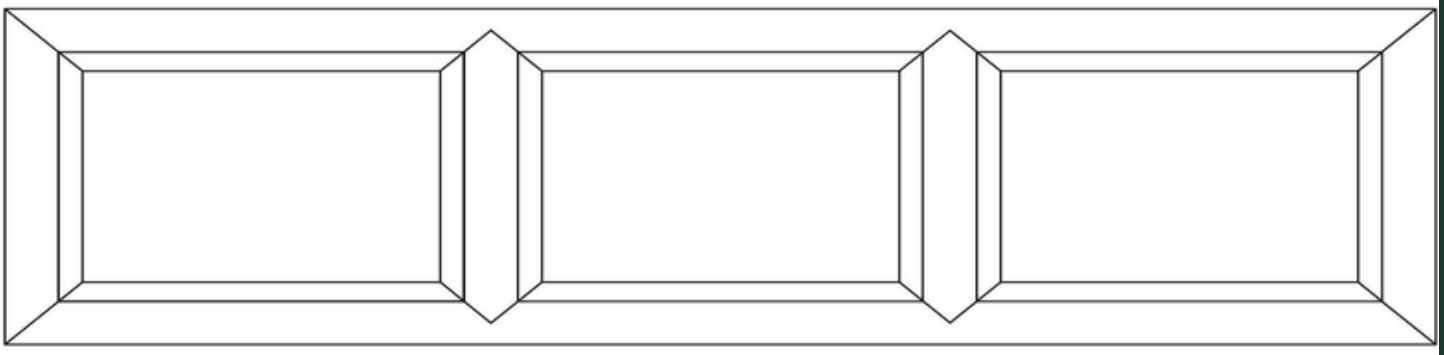

4+ Panels with standard size stiles & rails (up tp 96” wide or tall): *use matching door sq.ft. price + 75% per sq.ft.*
4+ Panels with custom size stiles & rails (up to 96” wide or tall): *use matching door sq. ft. price + 100% per sq. ft.*

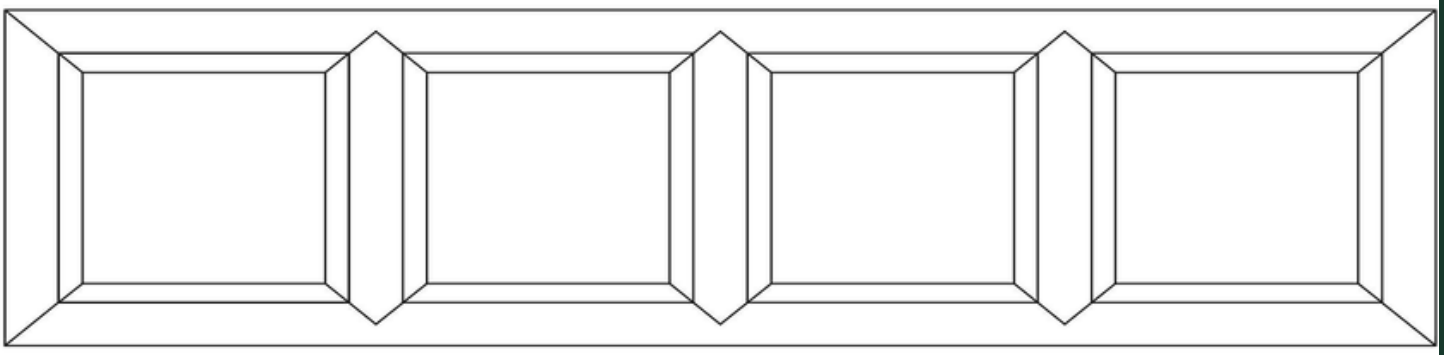

Panels under 12" wide, under 12" or over 96" wide or tall: fax or email drawing for price quote.

Wainscot Panels: Mitered

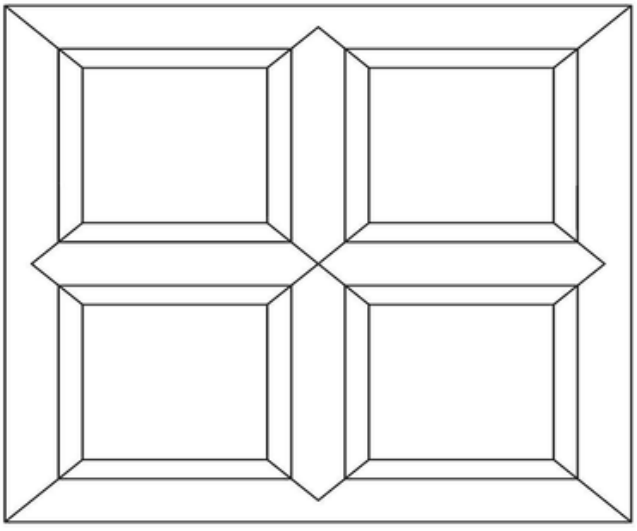

Recommended to order with D-3 (square) Outside Edge.
Mitered frames must be ordered with the same size stiles and rails.
Standard frame size options are 1 3/4”, 2”, 2 1/4”, 2 1/2” & 3”.
Not all mitered door styles are available in all frame sizes, refer to profile pages for availability.
CAD or detailed drawing required.
Wainscot Panels less than 4 sq.ft. will be quoted as a flat fee.

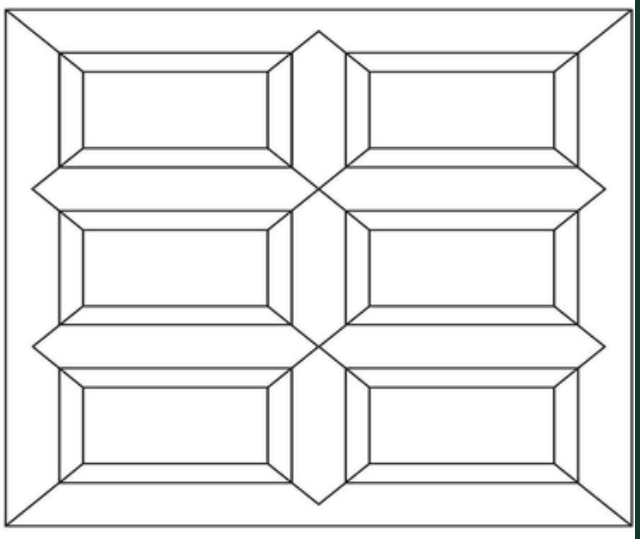

3 Panels (up tp 96” wide or tall): *use matching door sq.ft. price +50% per sq.ft.*

4 Panels (up tp 96” wide or tall): *use matching door sq.ft. price +75% per sq.ft.*

4+ Panels (up tp 96” wide or tall): *use matching door sq.ft. price +100% per sq.ft.*

Panels under 12" wide, under 12" or over 96" wide or tall: fax or email drawing for price quote.

Mitered Profiles

The majority of our mitered profiles are available with 2 1/4", 2 1/2" or 3" stiles and rails for doors and 1 3/4" or 2" stiles and rails for 5-piece drawer fronts (refer to profile drawings for availability).
When selecting the stile and rail size, the dimension of the inside detail will not change.
The dimension of the flat area will increase or decrease depending on the size of the stile and rail.
Delaware Series profiles are modified depending on the size of the stile and rail selected (see below for details).

Delaware Series

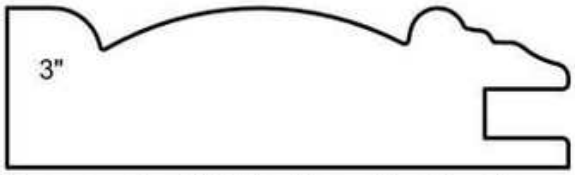

Delaware (Solid) & New Hampshire (Inset)
Doors are standard with a 3" stiles & rails, also available with 2 1/4" or 2 1/2" stiles & rails.
5-piece drawer fronts are available in both 1 3/4" & 2" stiles & rails.
Delaware/New Hampshire profile is modified depending on the size of the stile and rail (refer to profile drawings).

Columbia (Solid) & New England (Inset)

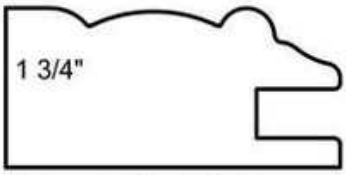

Doors are only available with 3" stiles & rails.
5-piece drawer fronts are only available with 1 3/4" stiles & rails.
This door is strongly recommended when hardware is required on the door frame.
(Example: large pulls on refrigerator panels).

Maine (Solid) & Vermont (Inset)

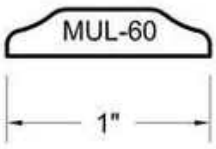

Doors are standard with 3" stiles & rails, also available with 2 1/4" stiles & rails.
5-piece drawer fronts are available in both 1 3/4" & 2" stiles & rails.
Maine/Vermont profile is modified depending on the size of the stile and rail (refer to profile drawings).
Doors and 5-piece drawer fronts come standard with a 1/4" rope molding.
Doors and 5-piece drawer fronts are available without rope molding. Must specify at time of ordering.
Refer to Delaware (Solid) & New Hampshire (Inset) pricing when ordering without molding.

Custom Doors & Valances

Custom doors are available in all door styles and thicknesses, with or without Applied Moldings.

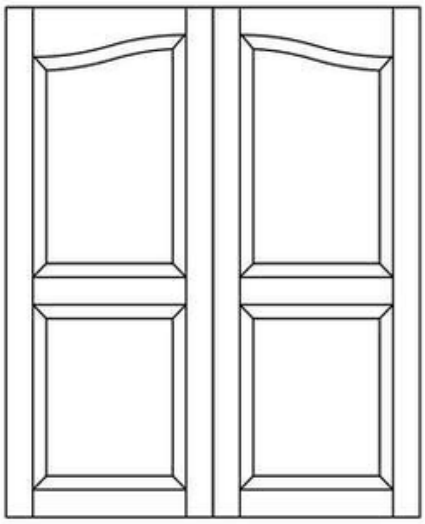

Fax or emailed drawings is required for price quote. CAD drawing preferred.

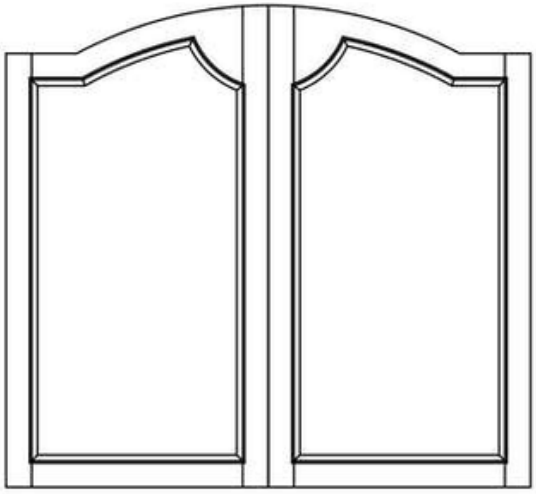

All option charges apply to sq. ft. cost (Example: larger stiles & rails and thicker doors are subject to an up charge).

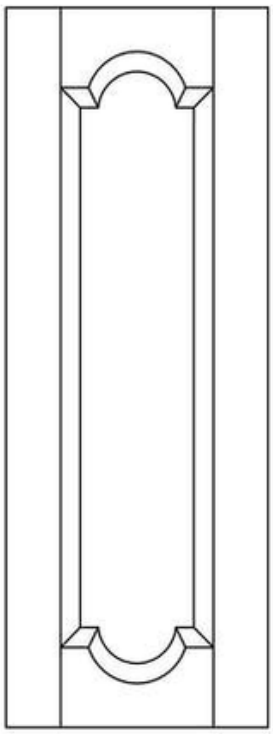

We will provide a CAD drawing for your approval prior to construction.

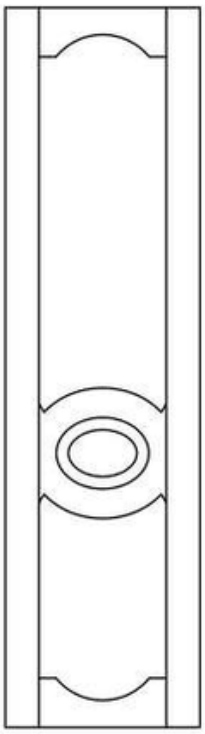

Lead time is between 2 to 4 weeks, once CAD drawings have been approved.

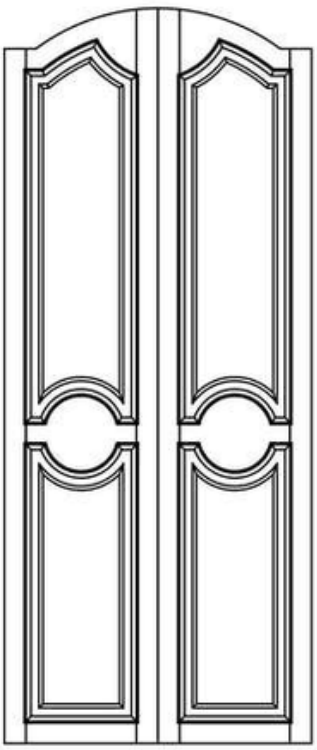

Visit our library of custom doors at shop.craftedcabinet.com

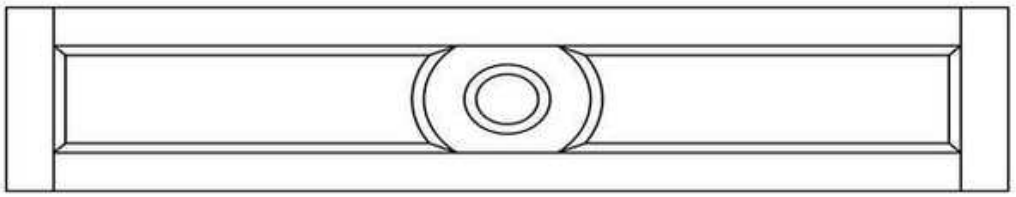

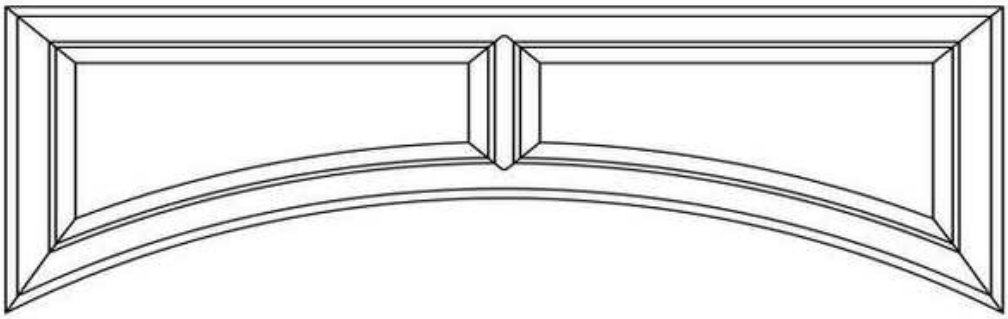

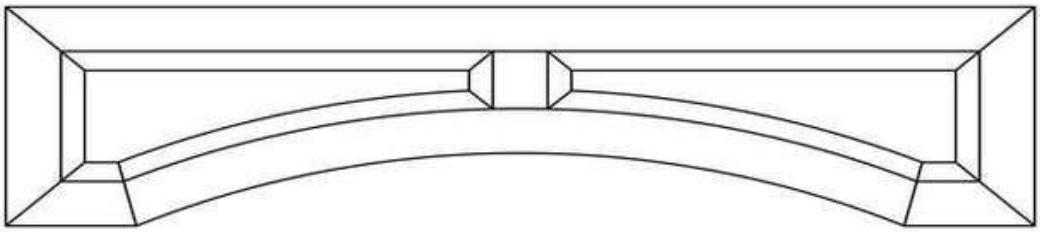

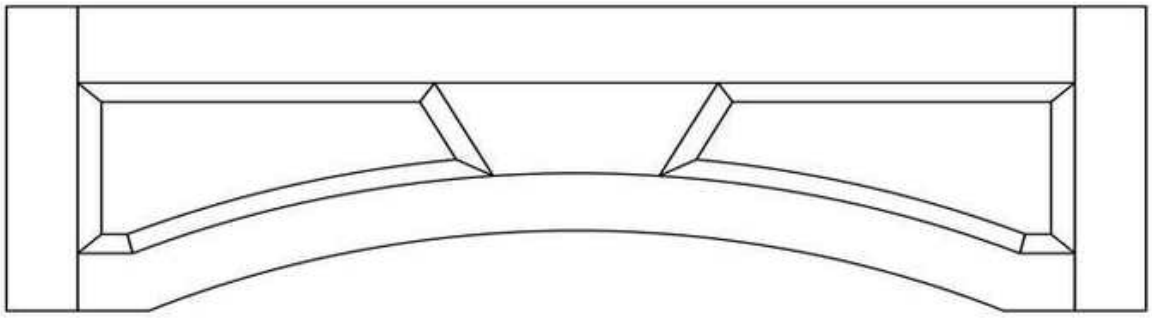

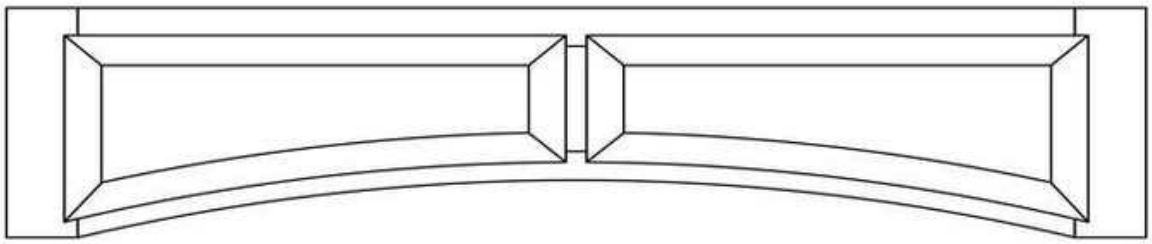

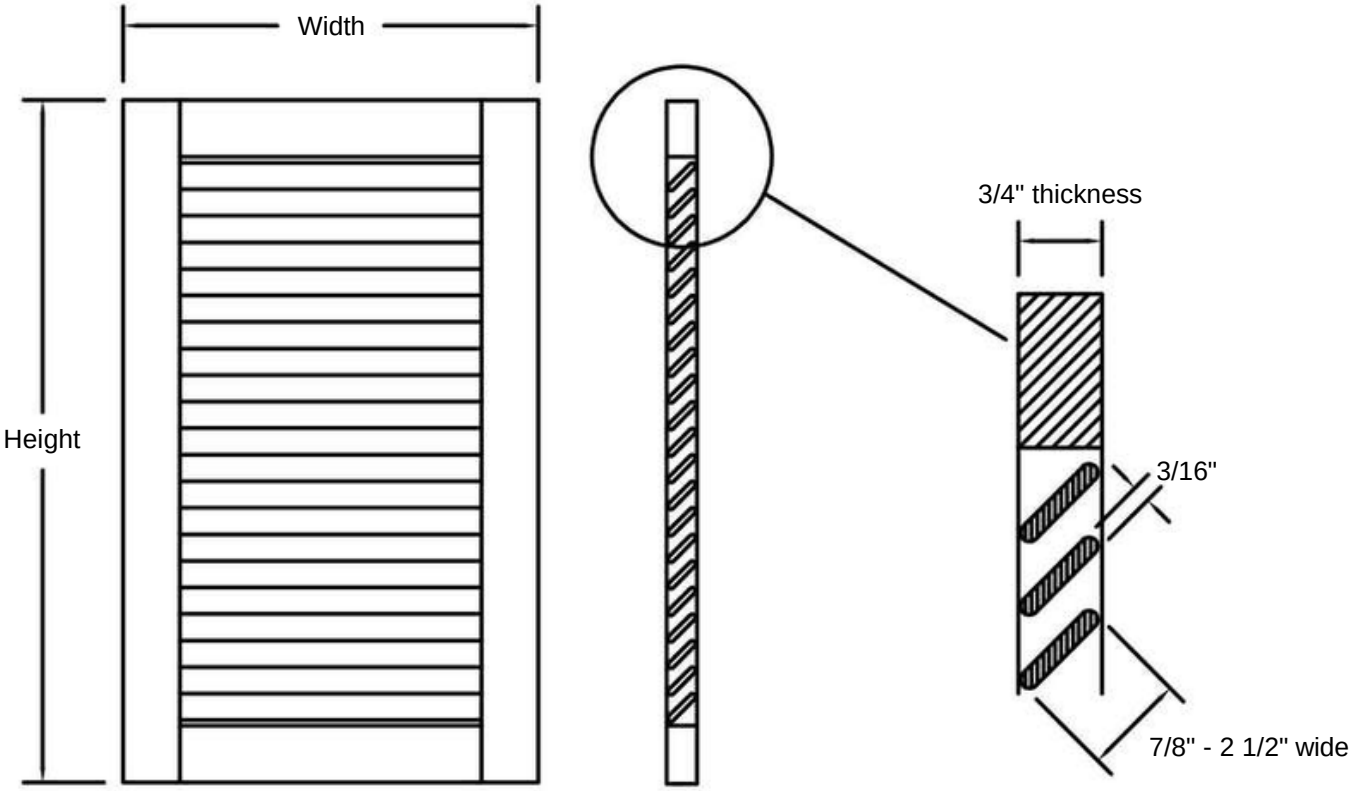

Open Louver Doors

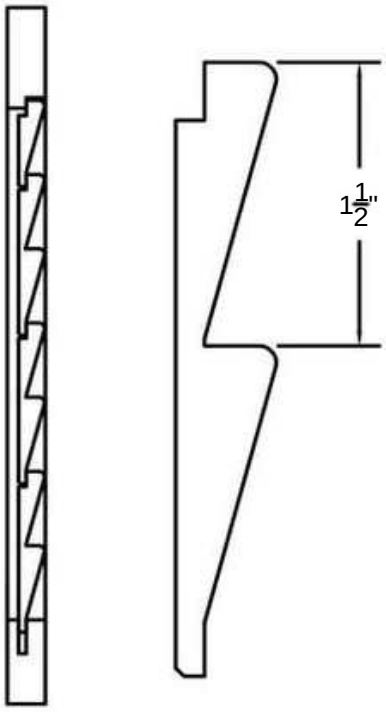

Open Louver Door Style

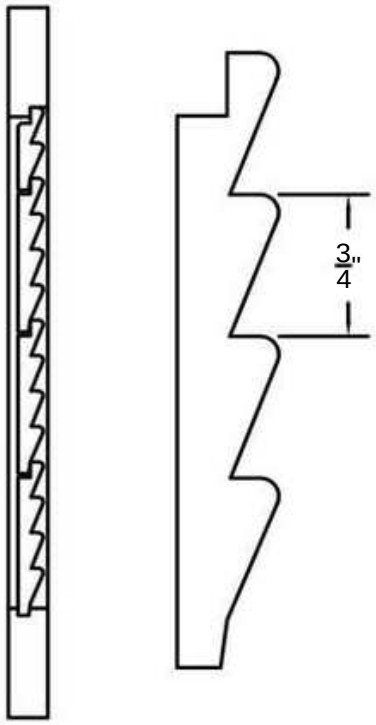

Open Louver Door Specifications:

- Available in most wood species.
- Standard stile & rail size 2 3/8" (optional frame sizes available upon request).
- Doors over 20" wide and over 48" tall are not guaranteed against warping, twisting and cracking.
- Doors 18" and wider will be built with a 1/2" vertical stabilizer bar on the back of the door to protect louvers from bowing.
- Standard thickness 3/4" (special thickness available upon request).
- All louvers are a fixed size. Rail size will vary based on the height of the door.

Large Closed Louver

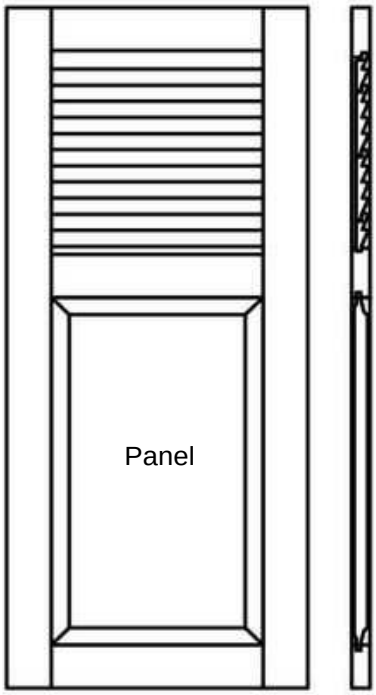

Small Closed Louver

Optional partial Louver Door

Drawing with specifications must be provided.

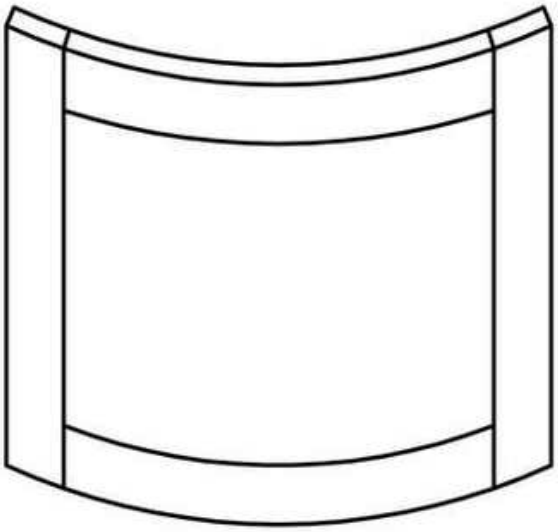

Large & Small Closed Louver Door Style

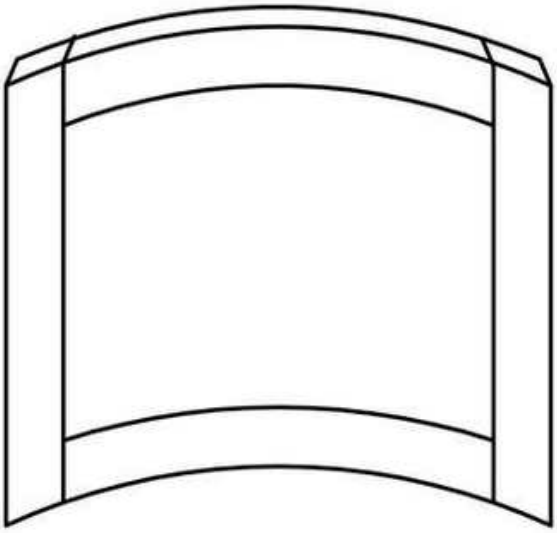

Large & Small Closed Louver Door Specifications:

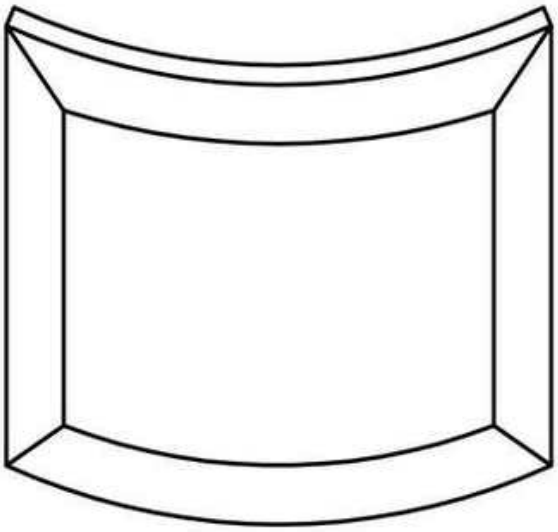

- Available in most wood species.
- Standard stile & rail size 2 3/8" (optional frame sizes available upon request).
- Doors over 20" wide and over 48" tall are not guaranteed against warping, twisting and cracking.
- Standard thickness 3/4" (special thickness available upon request).
- All louvers are a fixed size. Rail size will vary based on the height of the door.
- Standard panel profiles: F, C & S.

Radius Door Guidelines and Specifications

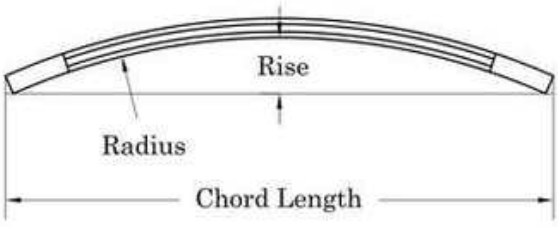

- Available in most wood species.
- When ordering rustic materials, frame will not have knots. Knots will only be on panel.
- Many door styles and profile options available.
  Not all door styles and profiles are available. Call for availability.
- Square or No Lip outside edge profiles only.
- Projection from a flat door to a radius door may cause profiles to not be an exact match.
- Plywood Panels are not available.
  If inset look is desired, then the doors must be manufactured with solid wood F Panel.
- All radius doors are manufactured at 3/4" thick.
- Radius doors are made with tangential but linear stiles so you can install European hinges and handles of any style.
- Doors are manufactured with multiple laminations. Layers may be exposed.
- Standard radius available in 12" 18" and 24" for both Concave and Convex.
  By ordering a standard radius, this eliminates additional programming and set up charges.
- Non-standard radius doors available for both Concave and Convex. Cad drawing preferred.
  If not available, please provide chord length and rise (see drawings below).
- A price quote will be presented and must be signed and approved prior to CAD drawing being produced.
- Once a price quote is approved we will produce a detailed CAD drawing with all specifications.
- CAD drawings must be signed and approved prior to production.
- $202.50 CAD Fee will be charged if order is not placed.
- Non-standard radius doors are generally delivered in 6-8 weeks after receipt of approved CAD drawing.
- Standard radius doors will have a shorter lead time.
  Lead time will be determined by door style, profile selection and receipt of approved CAD drawing.

Convex Radius Door

Face of Door

Concave Radius Door

Face of Door

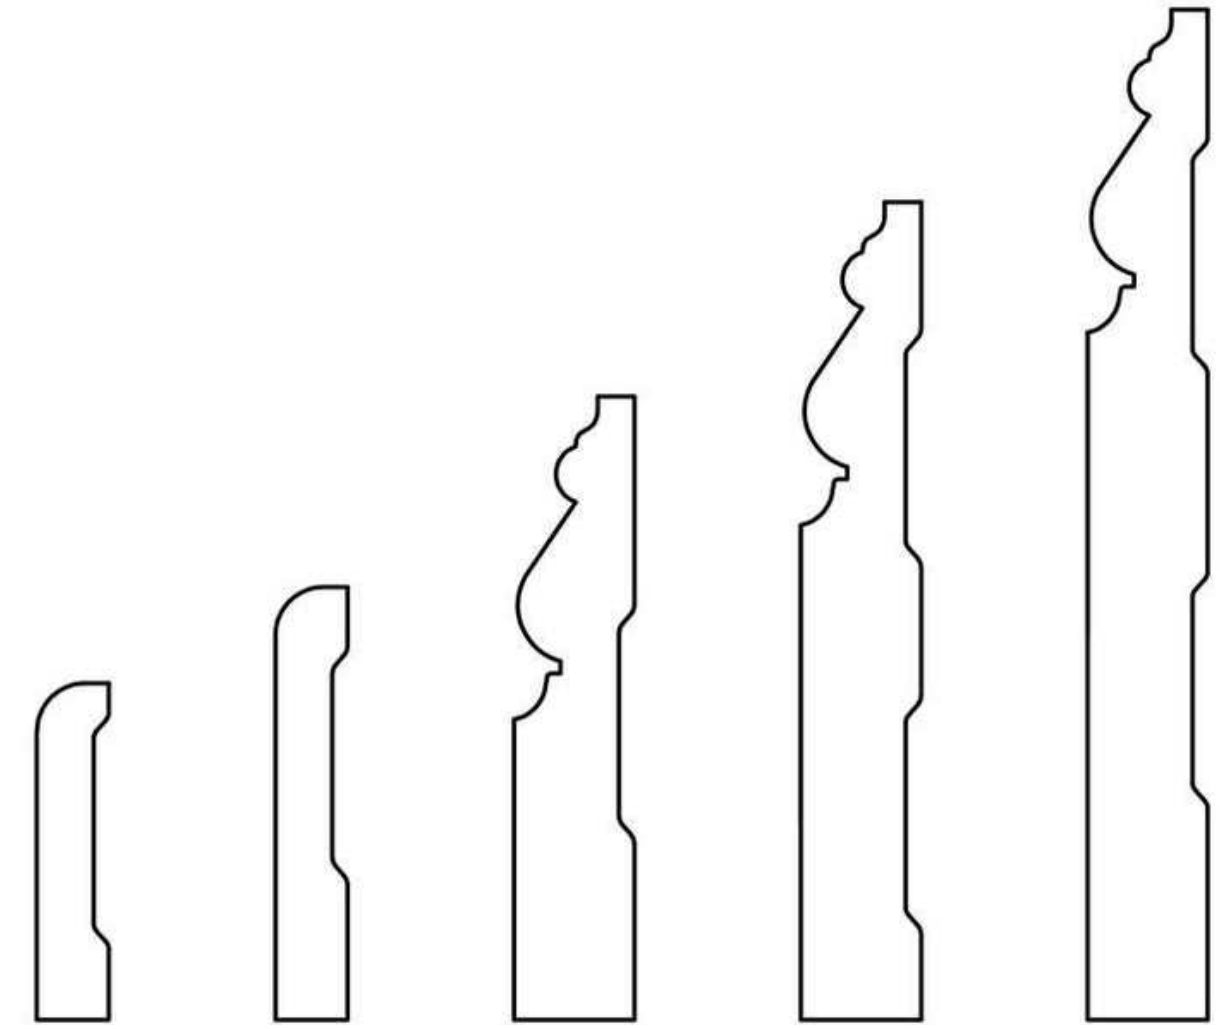

Radius Door Glossary:

Chord Length: length is measured from the inside of back edge to inside back edge.
Door Width: length of the arc on the face of the door.
Radius: the distance from the center of the circle to the edge of the back of door.
Rise: measured from the center of the back edge of the door to the center of the chord length.

Visit our website at shop.craftedcabinet.com for additional information and order forms for radius doors.

PLEASE NOTE:
For all specialty materials not listed,
call for pricing, availability and lead time.

Paint Grade Materials:

Available in Alder, Poplar, or Soft Maple.

Paint Grade Alder, Poplar and Soft Maple have large color variations and mineral streaks are acceptable.

This product can have a variety between small and/or large staves.

Paint Grade Warranty:

Paint Grade Doors & 5-Piece Drawer Fronts:

No warranty on PG Poplar Frame with MDF Panel, and all other solid & plywood doors that are painted.

We recommend and warrantee PG Maple Frame with MDF Panel for the most stability against bowing and warpage.

Paint Grade Solid & Routed Drawer Fronts:

No warranty on painting Solid Wood Drawer Fronts. We recommend and warranty MDF Solid Drawer Fronts

Paint Grade Solid Moldings:

No warranty on PG Poplar and all other solid wood species that are painted.

We recommend and warranty PG Maple for the most stability against bowing and warpage.

Alder - Select:

Natural consistency and beautiful color can give it the visual appearance of Cherry, Maple or Birch.

Alder dries to an even honey tone and can be finished to resemble more expensive fine-grained species.

There is little color variation between the heartwood and sapwood, making alder also ideal for light or natural finishes.

There can be small amounts of mineral in the machined areas. We recommend this product for natural to dark stains.

Alder - Rustic

Color variations may range from light tan to reddish brown.

There will be a wide range of rustic characteristics, mineral, random knots and cluster knots.

No loose or see thru knots. All knots are glued in. Knots can vary from small to large.

Frames with molded detail may have no knots. Color variation will occur. Mineral streaks are acceptable.

(Rustic Alder is available in plywood).

Cherry - Natural

Fine grain and smooth texture. Light brown to dark red heartwood, white to cream sapwood.

Expect some heart and sap together on the face and back. Pitch pockets and small tight knots are acceptable.

We recommend this product be used for medium to dark stains only.

(Natural Cherry available in plywood.)

Cherry - Select

Rich, deep reddish brown color and exceptional character.

Its interesting grain and smooth texture give it extraordinary finishing qualities.

There can be small amounts of sap and pitch in the machined areas.

Material will naturally darken, sometimes drastically, when exposed to sun and natural light.

This may be enhanced with light and clear finishes and is not considered a defect.

Doors may need to be resanded in order to accept dark finishes.

We recommend this product for natural to dark stains.

Cherry - Rustic

Fine grain and smooth texture. Color variations may range from sapwood to dark red heartwood.

There will be a wide range of rustic characteristics, gum pockets, mineral, random knots and cluster knots.

No loose or see thru knots. All knots are glued in. Knots can vary from small to large.

Frames with molded detail may have no knots. Sapwood and pitch are acceptable.

For Inset Panel Doors: use “F” Panel application (Rustic Cherry plywood is NOT available).

Hickory - Select

The hickory sapwood is white, tinged with brown, while the heartwood is pale to reddish brown.

Hickory has a coarse texture and usually straight grain, but can be wavy and irregular.

There can be small amounts of mineral in the machined areas

If specified all sapwood or all heartwood: add 25% to sq. ft. price.

Hickory - Rustic

Color variations may range from white to dark brown.

There will be a wide range of rustic characteristics, mineral, sapwood, random knots, cluster knots and some checking.

No loose or see thru knots. All knots are glued in. Knots can vary from small to large.

Frames with molded detail may have no knots. Mineral streaks are acceptable.

All materials will be structurally sound, but some small knots may be open.

For Inset Panel Doors: use “F” Panel application (Rustic Hickory plywood is NOT available) .

Mahogany, African (Flat Sawn)

Pale reddish-brown color with a straight, interlocking grain.

Color will vary from light to dark red. A disclaimer must signed prior to production.

This species is about 50% harder than most Mahogany woods.

There can be small amounts of mineral in the machined areas.

We recommend this product be used for medium to dark stains.

For Inset Panel Doors: use “F” Panel application (African Mahogany plywood is NOT available).

Mahogany, African (Ribbon)

Pale reddish-brown color with a straight, interlocking grain. Ribbon Grain is a combination of dark and light bands.

Color will vary from light to dark red. A disclaimer must be signed prior to production.

This species is about 50% harder than most Mahogany woods.

There can be small amounts of mineral in the machined areas.

We recommend this product be used for medium to dark stains.

For Inset Panel Doors: use “F” Panel application (African Mahogany plywood is NOT available).

Maple - Natural

This grade allows all color variations, including heartwood, bruising, sap and sticker marks on face or back.

A variety of small and/or large staves are acceptable.

We recommend this product be used for medium to dark stains only. Dark stains must be pre-sealed to avoid blotching.

Maple - Select

Hard Maple pulled specialty for white color. There can be small amounts of mineral in the machined areas.

We Recommend this product for natural to light stains. Dark stains must be pre-sealed to avoid blotching.

Maple - Rustic

Color variations may range from creamy white to medium brown.

There will be a wide range of rustic characteristics, mineral, random knots and cluster knots.

No loose or see thru knots. All knots are glued in. Knots can vary from small to large.

Frames with molded detail may have no knots. Color variation will occur. Mineral streaks are acceptable.

For Inset Panel Doors: use “F” Panel application (Rustic Maple plywood is NOT available).

Pine - Knotty

A closed-grain softwood that ranges in color of white, yellow and pink.

It contains solid knots and sap runs of various sizes contributing to the color changes within a piece of wood.

Knots will be structurally sound and may range in color from black to brownish red.

There can be small amounts of mineral in the machined areas. If no yellow material requested: add 25% to sq. ft. price.

Red Oak - Select

Hard, strong, open-grained wood that varies in colors of white, yellow and pink.

There can be small amounts of mineral in the machined areas. We recommend this product for natural to dark stains.

Sapele - (Flat Sawn)

Reddish brown wood that in many ways is similar to Mahogany.

The remarkable feature to sapele is that the grain is interlocked and changes direction in frequent, irregular intervals.

Color will vary from light to dark. A disclaimer must be signed prior to production.

There may be small amounts of mineral in machined areas. We recommend this product for medium to dark stains.

For Inset Panel Doors: use “F” Panel application (Sapele plywood in Not available) .

Sapele - (Ribbon)

Reddish brown wood that in many ways is similar to Mahogany.

The remarkable feature to sapele is that the grain is interlocked and changes direction in frequent, irregular intervals.

Color will vary from light to dark. A disclaimer must be signed prior to production.

There can be small amounts of mineral in machined areas. We recommend this product for medium to dark stains.

Sapele Ribbon does not produce as consistent of a coloration as flat sawn, but ribbon sapele does boast increased stability.

For Inset Panel Doors: use “F” Panel application (Sapele plywood is NOT available).

Walnut - Select

Heartwood varies from a purplish-brown with thin dark veins to gray-brown and even orange-brown.

The narrow sapwood tends to be white. Unfigured Walnut has a straight, somewhat open grain.

Material is steamed to enhance the brown and darken the sapwood.

There can be small amounts of mineral in the machined areas.

We recommend this product for natural to dark stains.

Walnut - Rustic

Wide color variation from light sapwood to dark heartwood throughout.

There will be a wide range of characteristics, random knots and cluster knots.

No loose or see thru knots. All knots are glued in. Knots can vary from small to large.

Frames with molded detail may have no knots. Mineral streaks are acceptable.

For Inset Panel Doors: use “F” Panel application (Rustic Walnut plywood is NOT available) .

White Oak - Select

Color can vary from a very light straw color to a brown color. The wood also be speckled with gray.

Dense with coarse open grain. It is very strong and hard. There can be small amounts of mineral in the machined areas.

We recommend this product for natural to dark stains.

White Oak - Rustic

Color can vary from a very light straw color to a brown color. The wood also be speckled with gray.

Dense with coarse open grain. It is very strong and hard.

There will be a wide range of characteristics, random knots and cluster knots.

No loose or see thru knots. All knots are glued in. Knots can vary from small to large.

Frames with molded detail may have no knots. Mineral streaks are acceptable.

For Inset Panel Doors: use “F” Panel application (Rustic White Oak plywood is NOT available) .

White Oak - Rift (Straight Grain)

Color can vary from a very light straw color to a brown color. Dense with coarse open grain. It is very strong and hard.

There can be small amounts of mineral in the machined areas. We recommend this product for natural to dark stains.

Rift Sawn lumber is cut in such a way that the grain will have a straight, thin pencil line appearance.

White Oak - Quartersawn

Color can vary from a very light straw color to a brown color. Dense with coarse open grain. It is very strong and hard.

It is very strong and hard. There can be small amounts of mineral in the machined areas.

We recommend this product for natural to dark stains.

Quartersawn lumber is cut in such a way that the grain will have a straighter appearance and there will be flecks in the face of the product.

For Inset Panel Doors: use “F” Panel application (White Oak - Quartersawn plywood is NOT available).

Moulding is priced per linear foot. Minimum order 5 pieces or a $114.75 minimum charge. All wood mouldings come standard in 8 foot lengths; 10 foot lengths are available in some species — call for availability. Anything over 8 feet ships by freight; tick “cut in half” above to keep an 8 or 10 foot run in a parcel box.
